AVAILABLE UPON REQUEST

DEVELOPER PROJECTS

FILE EXPLORER (JAVA) | FILE EXPLORER APP FOR ANDROID

A solo project aimed at using OS level functions for an Android app. The app has file navigation. Any file type can be opened from GIFs to PDFs. File creation and deletion is available singularly or multiple can be selected for a batch deletion.

METEOR WEBSITE (JAVASCRIPT, CSS, HTML, MONGODB) | HOTEL MANAGEMENT WEBSITE USING METEORJS

This was a five man group project to make a general hotel management website. The website was designed with the Bootstrap and MeteorJS frameworks. The site used an MVC model with the database being MongoDB.

SHELTERCONNECT (JAVA, PHP, SQL, GOOGLE FIREBASE) | MOBILE APP FOR HOMELESS SHELTERS

ShelterConnect was a mobile application group project. The goal of the app was to provide a real time list of current homeless shelter needs in the area to let any potential donor know who needs what in case they would want to donate items on the list.

AWARDS
